

INFORMATION SECURITY

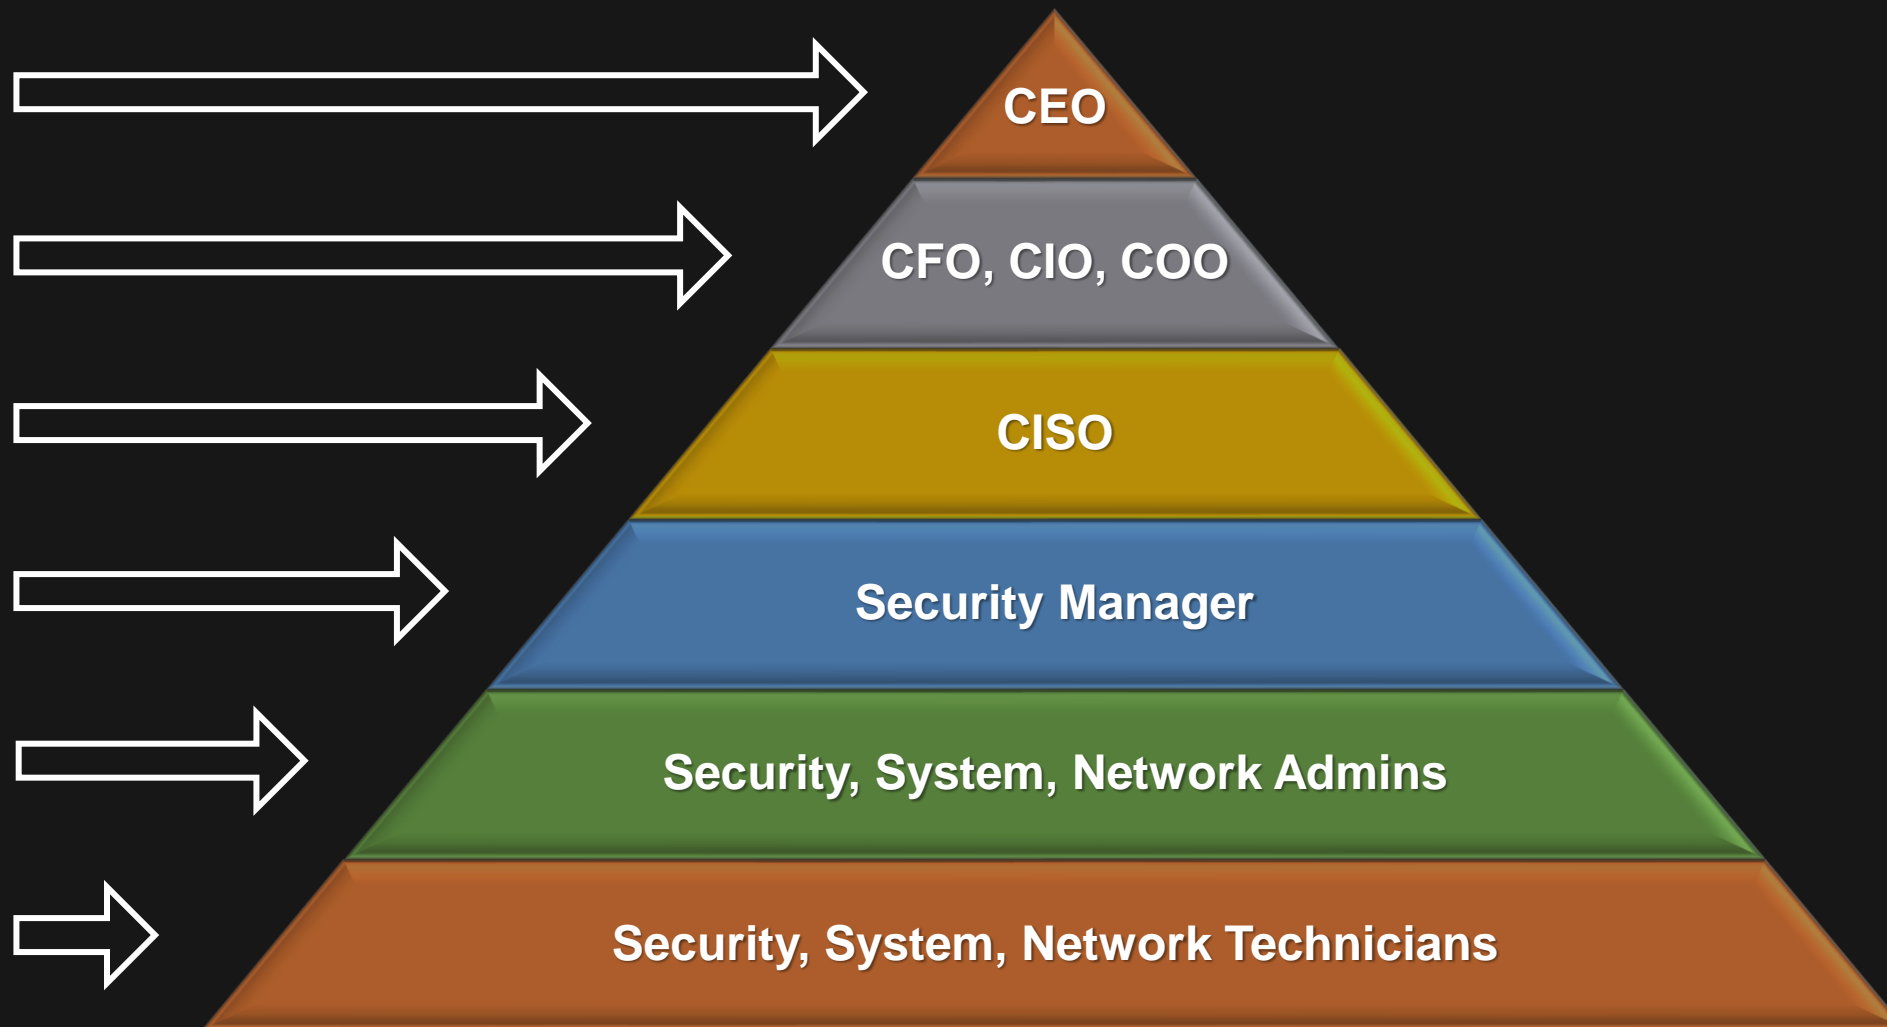

Fundamentals

SECURITY GOVERNANCE

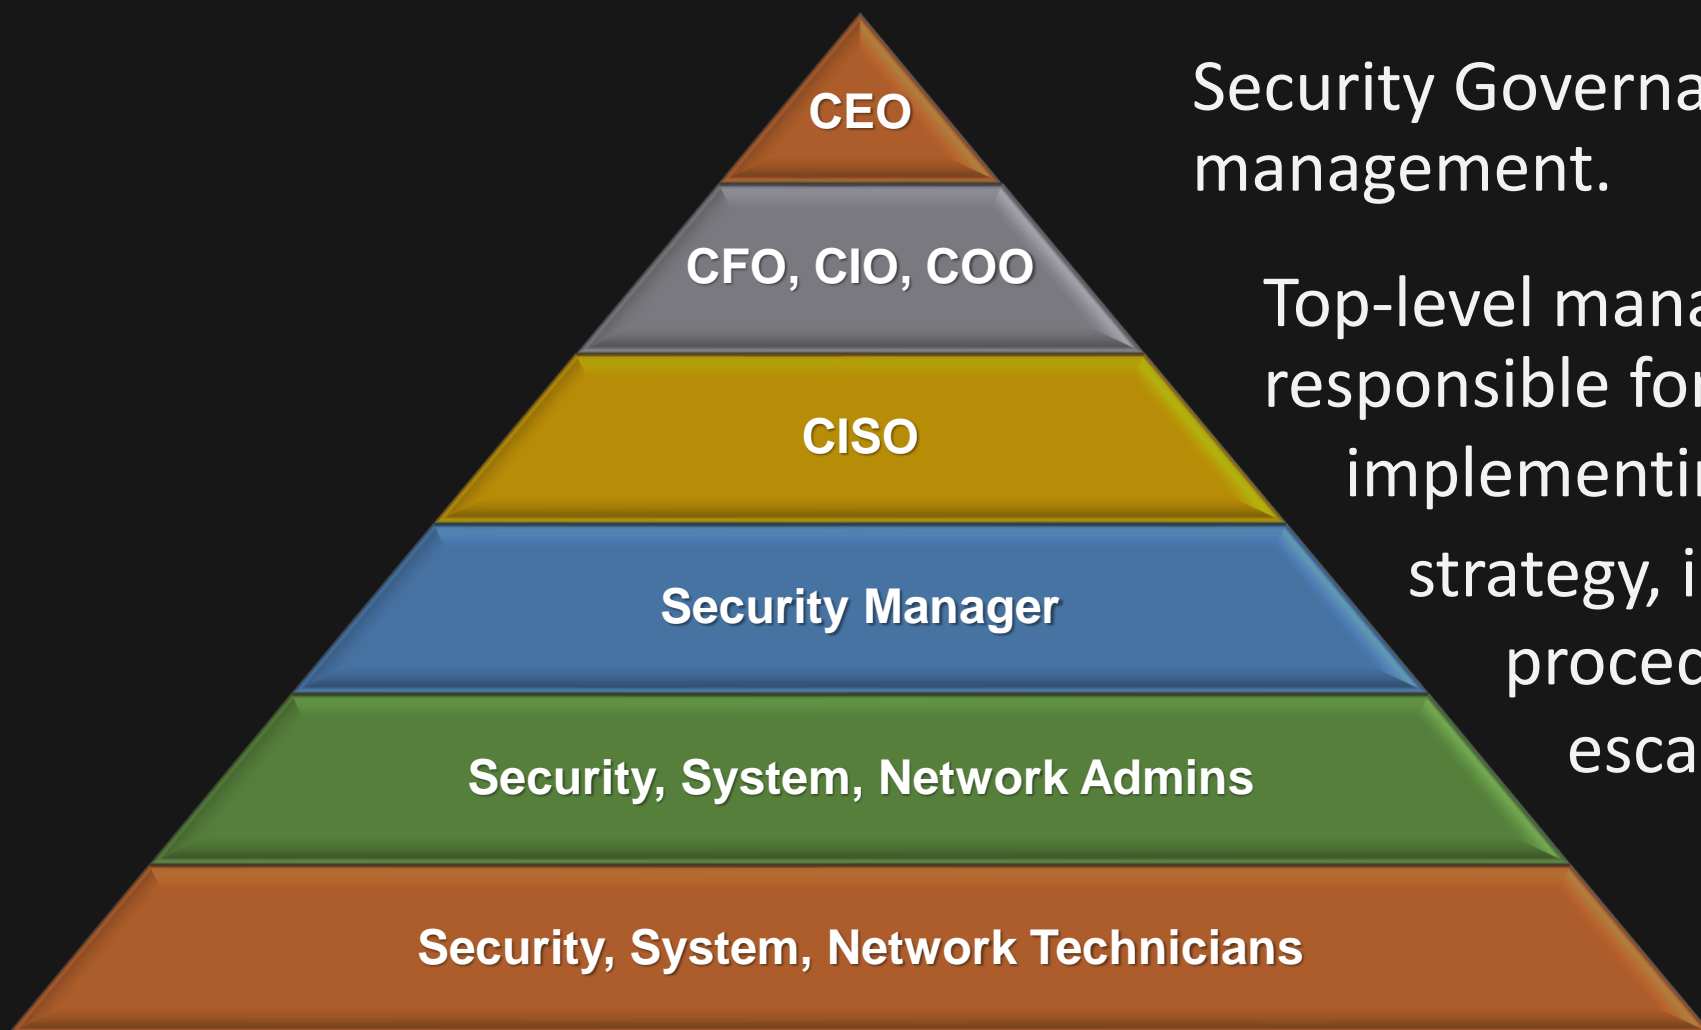

Information security governance can be defined as the process of establishing and maintaining a framework to provide assurance that information security strategies are aligned with,

and support business objectives, are consistent with applicable laws and regulations through adherence to policies and internal controls, and provide assignment of responsibility, all in an effort to manage risk.

SECURITY GOVERNANCE

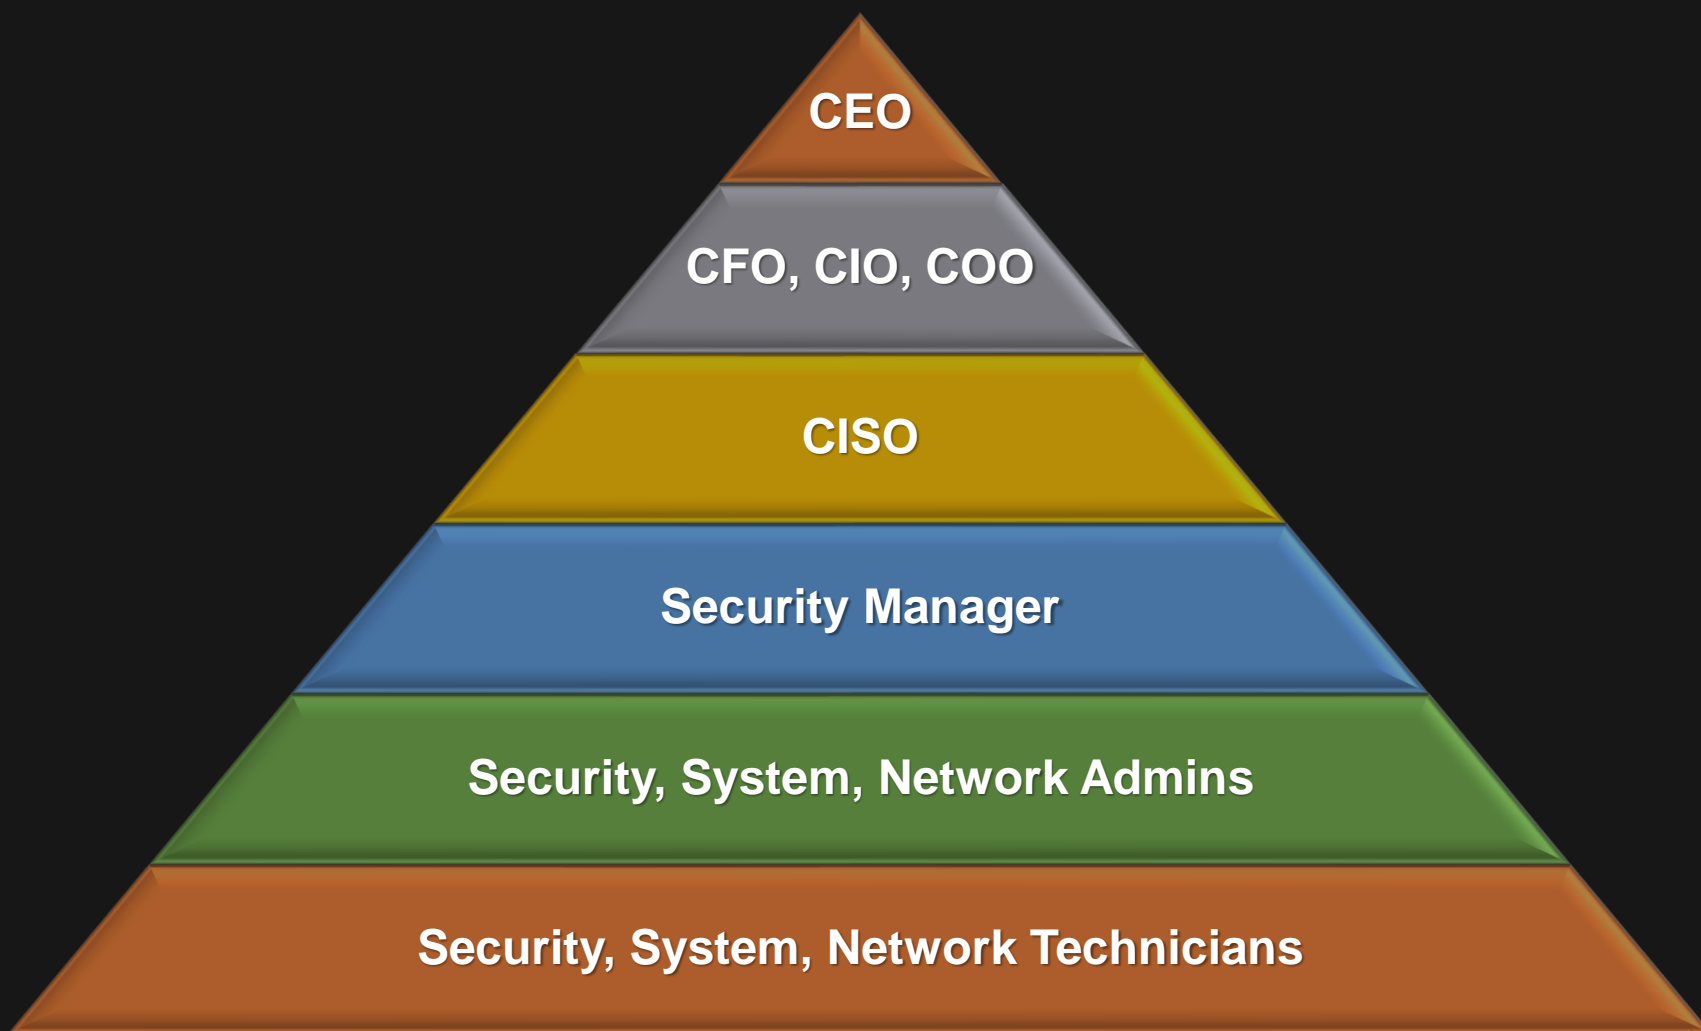

TOP-DOWN APPROACH

Security Governance starts with upper management.

Top-level managers are the ones responsible for initiating, creating, and implementing your data protection strategy, including policy creation, procedural instructions, and escalation plans.

BOTTOM-UP

SECURITY GOVERNANCE
